

Alexander Pierce

Eagan, MN 55123 | 651-410-0017 | alecpierce19@gmail.com | <https://alterproject.space>

Overview:

- Software Engineer with 8+ years of experience coding in enterprise-scale applications using Angular, Java, and JVM Languages such as Scala, Kotlin, and Groovy
- Experience in working with developers, leadership, and business stakeholders
- Solid understanding of RESTful APIs and solid experience building them
- Solid understanding of CI/CD and how to build and deploy a product to production
- Comfortable with APIs and integrations, debugging, working with imperfect systems, SQL databases and data-driven applications, as well as version control systems like Git

Projects:

Portfolio Site:

- Home page consists of navigation, small summary, bootstrapped icons for links to socials, download button for resume, and my resume displayed through a PDF display library
- "Hero Menu" page that shows the use of carousel, dialogs, conditional display logic, and a music player
- "Sales Analyzer" page that shows off a sample use of Sales Analyzer project
- Deployed with netlify

Sales Analyzer:

- Angular frontend that submits information through a form, then formats and displays the retrieved data
- Designed a custom spinner to be used when awaiting feedback from backend
- Flask backend that sends a request to OpenAI API and sends the response's body back to the frontend
- Uploaded docker images to Google Cloud's Artifact Repository
- Mounted secrets to docker containers as a volume to keep API key secure
- Used a NGINX server for frontend and backend using unicorn while being deployed with Cloud Run

Google Maps Maker:

- Javascript application that runs on vite
- Uses Google Maps Places API to show nearby businesses
- Users can add custom markers to the map

Work Experience:

Cognizant Softvision – Senior Software Engineer

Jan 2024 – Aug 2024

- Built MVP front-end applications from the ground up using Angular as the lead web developer
- Engineered an infinite scrolling reusable component for their in-house npm library to display paginated data
- Implemented reactive web pages based on Figma designs created by Product Managers and UX Designers
- Collaborated closely with management and team members to create JIRA stories for their developers
- Migrated enterprise level existing repositories while preserving historical data using GIT

Cognizant Softvision – Software Engineer

Jun 2021 – Dec 2023

- Optimized the search performance by 40 seconds for paginated search result tables
- Assumed team lead responsibilities for 3 months to maintain project delivery timelines and run agile ceremonies during leadership transitions
- Achieved position of lead knowledge expert regarding legacy application functionalities within the team
- Implemented reactive web pages based on Figma designs created by Product Managers and UX Designers
- Resolved data conversion challenges that occurred with existing DocuSign integration
- Created PDF forms to be used for web applications in Adobe Acrobat Pro
- Performed code reviews to meet client standards and gave feedback using Gitlab
- Presented a small proof of concept for session management using Redis and Docker
- Addressed compliance issues by rectifying CWEs discovered with Veracode static analysis tool
- Investigated and resolved memory leak issue caused by a PDF displayer dependency by analyzing metrics in Datadog and examining Java heap dumps

Virgin Pulse – Associate Software Engineer

Jan 2019 – Dec 2020

- Developed admin tools for portal use incorporating Angular2 on the frontend and Java on the backend, while transitioning java classes and services to Kotlin
- Maintained full stack legacy applications, server pipelines, builds, and deployments to production ensuring stable builds and environments using Rundeck, TeamCity, and GitLab
- Implemented WCAG guidelines and accessibility features to legacy applications, enhancing user experience and compliance for client

Maverick Software Consulting – Software Engineer Intern

Apr 2017 – Dec 2018

- Resolved XML conversion bugs across lower environments and production
- Developed, maintained, and tested new conversion modules utilizing HTML/JSON parsers
- Converted existing projects to Java 8 with a focus on maintaining backward compatibility with Java 6

Education:

Minnesota State University, Mankato

Dec 2018

- Bachelor of Science: Management Information Systems

Graph Developer – Associate Certificate

May 2023

- ID: d11e2f7a-4a53-4905-891f-35f1c5fd2c9f

Skills:

- Backend Technologies: Java, Spring, GraphQL, Scala, Groovy, Kotlin, PostgreSQL, Hibernate
- Frontend Technologies: Angular, CDK, MaterialUI, HTML5, SCSS, Typescript, Javascript, JSON, Jest, Reactjs
- Development Tools: GIT, Bitbucket, Azure DevOps, JIRA, TFS, SVN, Bash, Google Cloud, Netlify
